Make one 0, see where people drivemore

Make one qual interval and change others to match

Get rough draft for next week, if possible, then maybe start planning

Be upfront about problems with data

Colorcode thesis, highlight the new sections

Possible to clearly intrigate this with cdm thesis.

Vector to raster conversion- creating statistical surface- n drive-software documentation library- arc gis extensions--software manual for visual analysis (talks about raster data)

Reference to explain what I’ve done

Describe what it is I am doing

Next Meeting:

Wed 7, 8am
